LIMPKIN IN HOWARD COUNTY, MARYLAND

JOANNE K. SOLEM

Mrs. Gretchen Duchac, of Lake Way Drive, near Benson Branch in central Howard County, Maryland, reported a Limpkin (*Aramus guarauna*) in her yard on Tuesday, May 28, 1985. She realized from range maps in field guides that it was an unusual bird for this state and was concerned that, because of its tameness, it might have escaped from a sanctuary and should be captured before neighborhood cats and dogs injured or killed it. She had seen it Sunday, Monday, and Tuesday (May 26-28,) mostly between mid-afternoon and evening; on Tuesday she also saw it between 8 and 10 a.m.

On Wednesday morning Martha Chestem, Grazina McClure, and I drove out to investigate the report, arriving shortly before 9 a.m. The houses on the west side of the last few hundred yards of Lake Way Drive, are shaded by tall, deciduous trees with numerous lawn plantings and evergreens. A small stream runs through some of the properties. A fenced pasture containing several horses occupies a few acres at the end of the cul de sac. We discovered the bird on the property of William Winkler, which adjoins the Duchac's. When we pulled up to the Winkler's house, I got out of the car to see if anyone was home besides a barking dog. As I reached the porch, Marty called to me that the bird had been standing to the right of the driveway perhaps, 25-35 feet away. She and Grazina had seen it fly to another part of the yard near the road where it began to feed actively, mostly in the shadow of the trees. We watched it with binoculars for 20 minutes from 75-125 feet when we were outside the car, and as close as 25-30 feet when we were inside it. The Limpkin seemed to be relatively unconcerned by our presence. Eventually, it walked closer to the driveway where the light was better.

Our first impression was of a brown wading bird with a heavy, yellowish dark-tipped bill and a body that was covered, at least in part, with triangular white markings. It appeared to be almost as tall as a Tricolored Heron (*Egretta tricolor*) when it stretched its neck, although it was stockier.

The bill was heavy, slightly decurved and almost twice the length of the head. It was a deep yellow-orange except for several inches of gray at the tip. The top of the upper mandible was also gray from base to tip, so when the bird looked directly at us the bill appeared totally gray. The head was light brown with a dark eye and the light-brown neck was streaked with white. The upper two-thirds to three-quarters of the body was covered with isosceles triangle-shaped white spots which were largest toward the center of the back and across the middle of the folded wings. The lower one-quarter to one-third of the body was a warm, rich unspotted sable brown. The legs were long, sturdy and (depending on the light) seemed to be greenish-gray or slatey-gray. The long-toed feet appeared to be webless.

The Limpkin stalked around the lawn staying mostly under tall trees and eating earthworms. Mrs. Duchac later mentioned that she and her husband had also seen it eating grubs. Occasionally, it flipped the rear portion of its body (one can hardly refer to that stubby appendage as a tail). It walked with an unhurried, though rather awkward gait. At no time did we hear any vocalizations. Mrs. Duchac had heard it make a clacking sound which she likened to castanets or bones being rattled together. The bird appeared to be healthy and had no leg bands.

In addition to the sightings on the residential properties along Lake Way Drive, the Limpkin was seen by a number of birders during the following week near a small, partly wooded pond beyond the houses at the end of the cul de sac. It was also observed infrequently in the horse pasture.

Michael McClure and John Clegg photographed it the evening of May 29. The Limpkin was last seen the morning of June 10, 1985 by Martha Chestem.

The only previous Limpkin reported in Maryland was present at Lilypons, Frederick County May 25 to June 8, 1971 (*Maryland Birdlife* 28(1):3-6).

[This report has been accepted by the Maryland Bird Records Committee — Ed.]

GREAT BLUE HERON TAKES CLAPPER RAIL

GUY W. WILLEY

On January 23, 1977 I was visiting my property on Shorter's Wharf Road in Dorchester County, Maryland with my sons, Guy Jr., and Robbie. At about 4:15 p.m. we observed the following:

A Great Blue Heron (*Ardea herodias*) was standing in open water near the end of a culvert. We had seen the Great Blue and a Clapper Rail (*Rallus longirostris*) using the open water in the culvert since about the first of January. A small area, about 2 by 6 feet was open at each end of the culvert. We saw the Great Blue capture what we believe was the same Clapper Rail at one end of the culvert, and fly off with it to a clear area. We made no effort to run the Great Blue away from the rail, as the victim appeared near death. We watched the heron eating the rail for about two minutes before we left. I returned the next day and found the remains of the rail.

Great Blue Herons suffered losses during the severe weather of late December 1976 and January 1977. I found more than ten dead Great Blues during January and the first half of February. We have also received reports from birders and trappers of dead or dying Great Blues during this period, as well as reports of mortality of several rails. It was also reported that for the first time since the mid 1930's Muskrats (*Ondatra zibethicus*) were forced to cut through the sides of their houses, because escape canals froze over in many areas. The severe cold also killed off many of the Nutria (*Myocastor coypus*) in Dorchester County.

Blackwater N.W.R., Cambridge, Md. 21613

THE SEASON

Fall Migration, Aug. 1-Nov. 30, 1985

ROBERT F. RINGLER

The most notable feature of this season's weather was the extreme warmth of the second half with record high temperatures in November. The number of passerines induced to remain beyond their usual migration time was extraordinary. This can be seen particularly among the warblers. Despite average or above rainfall, water levels at most reservoirs continued to fall producing more excellent shorebirding. Waterbirds at Hart-Miller in Baltimore County, Liberty Reservoir in Carroll County, and North West Creek at Tower Gardens on Kent Island will be reported in greater detail in separate articles.

Abbreviations: DC = District of Columbia, PWRC = Patuxent Wildlife Research Center, WMA = Wildlife Management Area, "+" = other observers. References to banded birds do not have observers listed but are applicable to the banders noted below.

Observers: Garrett County—Connie Skipper, Sallie Thayer (banding at Mt. Nebo); Allegany—Teresa Simons; Washington—Alice Mallonee, Sam Shoemaker; Frederick—David Wallace; Carroll—Dave Harvey; Baltimore—Hank Kaestner, Mike Resch, Barbara Ross (banding at St. Timothy's near Stevenson), Joe Schreiber (banding at Parkville), Steve Simon, Pete Webb, Jim Wilkinson; Harford—Dennis Kirkwood, Bob Schutsky; Howard—Bob & Jim Bogdan, Jon E. and Jon K. Boone, Martha Chestem, Chuck Dupree, Jane Farrell, Linda & Steve Harsy, Chris Ludwig, Grazina & Mike McClure, Harvey & Marion Mudd, Jim Orgain, Don & Jan Randle, Jo Solem, Eva Sunell, Mark Wallace, Paul Zucker; Montgomery—Larry Bonham, Margaret Donnalld (banding at Adventure Sanctuary), Greg Gough, Robert Hilton, Michael & Paul O'Brien; District of Columbia—Dave Czaplak; Prince Georges—Deanna Dawson (banding at PWRC), Sam Droege, Chan Robbins (banding at Laurel), Wally Sumner; Anne Arundel—Alex & Helene Hammer, Wayne Kockner, Bob & Pat Melville (banding near Lyons Creek), Bill Murphy, Sue Ricciardi; Charles—Paul Nistico; Calvert—Roger Anderson, Walter Kraus, Jim Stasz; St. Marys—Ron Runkles, Erika Wilson; Kent—Jim & Patricia Gruber, Dolly & Sam McSorley (banding at Damsite); Queen Annes—Rick Blom; Caroline—Annabelle & Elsie Billbrough, Ethel Engle, Jerry & Roberta Fletcher, Inez Glime, Marvin Hewitt, Alicia Knotts, Mariana Nuttle, L.T. Short; Talbot—Jan Reese; Lower Eastern Shore—George & Henry Armistead, Sam Dyke, Floyd Hayes, Ron Naveen, Charlie Swift, Dave Walbeck, Robert Warfield.

Loons, Grebes. Red-throated Loons were widely reported in small numbers with the first at Hart-Miller on Oct. 19 and 4 there on the 26th (Ringler +) when single birds were also seen near Bellevue (Armistead) and at Havre de Grace (Kirkwood). Other Red-throated Loons were 1 on the Potomac off the National Colonial Farm on Nov. 2 (Hammers, Wilkinson), 1 at Loch Raven on Nov. 8-20 (Simon), 1 at

Eastern Neck on Nov. 10 (Hammers +), 4 at Point Lookout on Nov. 16 (M. O'Brien) and 1 at North Branch in Allegany County also on the 16th (Hammers, Webb); all of these were topped by the approximately 500 that Warfield saw on Nov. 14 flying past Assateague. Armistead saw 5 Common Loons near Bellevue on Sept. 29 and 45 there on Oct. 26. Other reports were 13 flying south past Ocean City on Oct. 14 (Czaplak), 80 at Hooper Island on Nov. 9 (Armistead +), 20 at Rocky Gap on Nov. 11 (Simons) and 254 at Point Lookout on Nov. 16 (M. O'Brien). High counts of Pied-billed Grebes were 59 at Deal Island WMA on Aug. 13 (M. O'Brien), 33 at Rocky Gap in Allegany County on Oct. 22 (Simons), 40 off Mockley Point on Oct. 26 (Nistico) and 21 at Loch Raven on Nov. 11 (Simon). Early Horned Grebes were 1 at Rocky Gap on Oct. 6 (Simons), 8 at Loch Raven on Oct. 17 (Simon) and 1 near Madonna on Oct. 21 and later (Kirkwood); other reports were 1 at Williston where it is rare in Caroline County on Nov. 9 (Short), 224 at Eastern Neck on Nov. 12 (J. Gruber) and 80 in DC on Nov. 21 (Czaplak).

Pelagics, Pelicans. Hayes saw 6 Wilson's Storm-Petrels from shore at Ocean City on Aug. 6, 6 were seen on a Sept. 21 pelagic trip (Naveen +) and an extremely late individual was seen at Ocean City on Oct. 14 (Czaplak). A single Northern Gannet was seen from Assateague on Oct. 19 and 7 from there on Nov. 29 (M. O'Brien). Reports of Brown Pelicans on the coast continued into the late summer with 4 at Ocean City on Aug. 1 (Warfield), 3 there on Aug. 7 (Hayes) and 4 off Assateague on Aug. 13 (M. O'Brien) while the last report of the season came from Chesapeake Bay when 2 or 3 were seen sitting on gill nets near Cove Point on Aug. 14 (Ann McVey +).

Cormorants. An early immature Great Cormorant was at Ocean City on Sept. 22 and another immature was at Point Lookout on Oct. 6 where there were 4 on Nov. 16 (M. O'Brien). Great Cormorants also appeared at a new site in the bay when 1 was at Hart-Miller on Oct. 11-26 with 2 there on the 19th (Kaestner, Blom +). Concentrations of Double-crested Cormorants were 52 at Cove Point on Aug. 24 (Ringler), 200 at Hooper Island on Sept. 8 (Armistead), 50 at Riverside on Sept. 15 (Ringler, Hammers), 30 in DC on Sept. 23 where there was a late bird on Nov. 24 (Czaplak), 187 in St. Marys County (32 off Trent Hall Road, 51 at Point Lookout, 104 at Point No Point) on Oct. 8 (Wilson), 130 at Hart-Miller on Oct. 11 (Ringler +), hundreds at Ocean City on Oct. 13 (Ringler +) and an estimated 1000 flying by Assateague on Nov. 14 (Warfield). Others were 1 in Carroll County at Liberty Reservoir on Sept. 22 (Mudd), 1 at Pinto on Oct. 5 (Simons), 2 at Tanyard on Oct. 27 (Engle), 3 at Patuxent River Park on Oct. 31 (Bill Portlock), an immature on Broadford Reservoir in Garrett County on Nov. 17 (Hammers, Webb) and 1 in Curtis Bay on Nov. 23 (Ringler).

Hérons. Walbeck noted American Bitterns at Deal Island WMA, where they certainly breed, from Aug. 27; other reports were probably migrants with 1 at Assateague on Oct. 12 (M. O'Brien +), 1 at Tilghman Island from Oct. 20 through Nov. 9 (Reese), 2 at Lilypons on Oct. 28 (Lola Oberman) and 2 at Irish Grove on Nov. 16 (Swift). The last reports of Least Bitterns were 1 at Lilypons on Aug. 3 (Hilton), 2 at Hart-Miller on Aug. 15 (Ringler, Therres) and an extremely late 1 at Deal Island WMA on Oct. 9 (Walbeck). Concentrations of Great Blue Herons were 46 at PWRC on Aug. 6 (Droege), 50 at Tower Gardens on Kent Island on Sept. 8 (M. O'Brien) and 26 at Masonville on Nov. 23 (Ringler); 7 flew south over Assateague on Oct. 12 (Czaplak +). Inland Great Egrets were 3 at Loch Raven on July 20 (Simon), 3 at Lake Elkhorn, Columbia, on July 31 (Orgain), 1 at Centennial Lake, Columbia, from July 27 (Solem, Farrell) through Aug. 17 (Chester), 18 at PWRC on Aug. 6 (Droege) and a late 1 at Piney Run on Oct. 20 (Ringler). Other late birds

were singles at Tanyard on Oct. 26 (Engle) and at Blackwater on Nov. 30, when there was also a late Snowy Egret (Armistead +). There were numerous reports of Little Blue Herons but the only concentration was 26 at West Ocean City on Aug. 13 (M. O'Brien). Others were 1 at Triadelphia Reservoir on August 10 (Zucker), 3 immatures at Loch Raven on Aug. 10 with 1 remaining on Sept. 15 (Simon), 1 in DC on Sept. 2 (Czaplak), through Sept. 17 at Deal Island WMA (Walbeck), an immature near Bellevue on Oct. 13 (Armistead) and another immature at Blackwater on Nov. 15 (Swift). Single inland Tricolored Herons were at Loch Raven on Aug. 11 (Wilkinson) and in Carroll County at Liberty Reservoir on Aug. 22-25 (Blom, Ringler); the last reported was 1 on Assateague on Oct. 19 (M. O'Brien). Flocks of Cattle Egrets seen were 51 at Norrisville on Aug. 31 (Kirkwood), 45 flying south in a vee past Chestertown on the same day (Gruber) and 83 near Golden Hill on Sept. 8 (Armistead) while others of interest were 5 near Madonna on Aug. 9 (Kirkwood), 1 at Piney Run on Sept. 27 (Harvey) and another near there on Oct. 20 (Ringler, Mudd), and 1 at Assateague on Oct. 19 (M. O'Brien). Green-backed Herons got little mention but Hilton counted a mediocre 16 at Lilypons on Aug. 3. There were 2 immature Black-crowned Night-Herons at Tanyard on Aug. 4 (Engle), 1 at Tilghman Island on Oct. 22 (Reese), 50 at Deal Island WMA on Nov. 15 (Swift) and 28 at Masonville on Nov. 23 (Ringler). The only report of Yellow-crowned Night-Heron was 1 at Lilypons on Aug. 3 (Hilton).

Ibises, Flamingo. There were 2 immature White Ibis at Loch Raven on Aug. 2 with 1 remaining through the 9th (Resch +). A Glossy Ibis was at Leading Point in Baltimore on Aug. 25-30 (Wilkinson), 1 in DC on Sept. 11 (Czaplak), 1 near Bellevue on Sept. 29 (Armistead), 1 at Lilypons on Oct. 5 (D. Wallace) and the last at Deal Island WMA on Oct. 6 (Walbeck). Warfield saw a Flamingo at West Ocean City on Aug. 16. This is about the sixth flamingo reported in Maryland. All are presumed to be Greater Flamingoes and all are presumed to have escaped from captivity.

Whistling-Ducks. Richard F. Weber reported seeing a flock of 25-30 Fulvous Whistling-Ducks at Point Lookout on Nov. 11 and photographing 1 on the beach at close range, the bird apparently being ill. This species occasionally occurs in the northeast in late fall either in flocks such as this that do not remain long or as individual birds that may stay for months.

Swans. The 2 Tundra Swans summering at Hurlock were still present on Oct. 14 (Ringler +). The major flight of this species passed on Nov. 15 with 450 going over Germantown that day (Warfield) and the fallout in the mountains the next day being 13 at the Mountain Lake sewage lagoons (Skipper) and 83 at Rocky Gap (Simons). At Hooper Island the flock of Mute Swans increased from 38 on Sept. 8 to 82 on Sept. 21 (Armistead, Gus Daniels). There were 2 adult Mutes and an immature at Williston on Nov. 28 (Short). This may be an inland nesting location.

Geese. An immature Snow Goose was in Howard County from Oct. 7 through the end of the period and a "Blue" Goose was there from Nov. 13 through Dec. 1 (M. Wallace). Armistead saw 8 Snow Geese near Bellevue on Oct. 12, 2 "Blues" were at Loch Raven on Oct. 23 (Simon) and at Blackwater there were 300 "Blues" on Nov. 9 and 900 on Nov. 30 (Armistead +). The first Brant of the season were about 50 flying past Assateague on Oct. 12 (Czaplak +) while 1 at Pooles Island on Oct. 30 (J. Gruber) was rare in the northern part of the bay. Walbeck observed 2 flightless Canada Geese at Deal Island WMA on Sept. 17 and later. Warfield noted flocks totalling 20 on Sept. 28, 70 on Oct. 12 and 138 on Oct. 20 over Germantown.

Puddle Ducks. There were 75 Wood Ducks at Pinto on Sept. 12 (Simons). Early Green-winged Teal included 4 at Eastern Neck on Aug. 30 (Gruber) with flocks of 75 at Deal Island WMA on Sept. 21 (Armistead), 40 at Mockley Point on Oct. 26 (Nistico) and 20 on Loch Raven on Nov. 18 (Simon). Simon's counts of American Black Ducks on Loch Raven increased from 8 on Oct. 8 to 78 on Oct. 31 and 180 on Nov. 1 and his high for Mallards there was 245 on Nov. 17. An early migrant group of 8 Northern Pintails was at Hart-Miller on Aug. 15 (Ringler +) followed by 1 at Tower Gardens on Sept. 6 (Klockner), 1 at Blackwater on Sept. 8 (Armistead) and others at Deal Island WMA beginning Sept. 9 (Walbeck) increasing to 400 there on Sept. 21 (Armistead) and 1000 on Sept. 29 (Dyke). Nistico added 20 Pintails at Mockley Point on Nov. 24. Also at Deal, Armistead estimated 450 Blue-winged Teal on Sept. 29 while Dyke found 500 there on the 29th. Late Blue-wings were 11 at Tanyard on Oct. 11 (Engle), 1 off Assateague on Nov. 14 flying south with a flock of scoters (Warfield), the last at Deal on Nov. 14 (Walbeck) and 3 at Loch Raven on Nov. 18 (Simon). An early Northern Shoveler was at Tower Gardens on Sept. 8 (M. O'Brien) and high counts were 55 at Hart-Miller on Oct. 11 and 50 at Hurlock on Oct. 14 (Ringler +). Early American Wigeons were 6 at Blackwater on Sept. 8 (Armistead) and at Deal Island WMA on the 9th (Walbeck). Inland flocks of wigeons were 30 at Piney Run on Oct. 6 (Ringler) and 89 at Loch Raven on Nov. 29 (Simon). At Deal the wigeons increased to 550 on Sept. 21 (Armistead) and 1750 on Oct. 6 (Dyke) while there were 200 at Mockley Point on Oct. 26 (Nistico). Exotic waterfowl this fall were a pair of Ruddy Shelducks at St. Michaels from Oct. 9 through the end of the period (Reese) and a drake Mandarin Duck flying with a flock of Wood Ducks on Nov. 17 (M. O'Brien +).

Diving Ducks. A crippled Canvasback was at Chesapeake Beach on Aug. 24 (Ringler) and a summering drake was at Sandy Point on Aug. 25 (Klockner). Nistico estimated 200 Canvasbacks off Mockley Point on Nov. 24. A Redhead on Sept. 13 off Damsite (Gruber) is exceptionally early to be a migrant and may have summered locally; the 13 at Pinto on Nov. 30 (Simons) were definitely migrants. Good counts of Ring-necked Ducks began with a drake at Piney Run on Oct. 6 increasing to 75 on Nov. 16 (Ringler) and 5 at Georgetown Reservoir on Oct. 7 increasing to 250 on Nov. 9 (Czaplak), 32 at Deep Creek Lake on Nov. 15 (Skipper) and 95 at Loch Raven on Nov. 29 (Simon). At Rocky Gap there were 9 Lesser Scaup on Oct. 11 and 35 on Oct. 23 (Simons), in Garrett County 226 (100 on Deep Creek Lake and 126 on Mountain Lake sewage lagoons) on Nov. 6 (Skipper) and off Mockley Point there were 500 on Nov. 24 (Nistico). At Hart-Miller there was a flock of 6000 scaup containing both Lesser and Greater Scaup on Oct. 19 (Ringler +). The first Oldsquaws of the season were 2 at Ocean City on Oct. 14 (Czaplak). Inland Oldsquaws were 4 at Loch Raven on Oct. 25 with 8 there on Nov. 16 (Simon), a drake at Beltsville on Nov. 13-14 with a female there Nov. 16-20 (Sumner), 45 at Deep Creek Lake on Nov. 16 (Hammers, Webb) and 14 at Rocky Gap the same day (Simons). Also on the latter date there were 250 at Point Lookout (M. O'Brien).

The following Black Scoters were notable: 1 at Hart-Miller on Oct. 19 (Ringler +), 2 on Conowingo Lake on Nov. 1 (Schutsky, Harold Morrin), 1 at Eastern Neck on Nov. 1 and 125 there on Nov. 14 (Gruber), 2 on Deep Creek Lake on Nov. 15 (Skipper) and a female at Boonsboro on Nov. 16 (Hammers, Webb) being a new bird for Washington County. Gruber also estimated 75 Surf Scoters and 250 White-winged Scoters at Eastern Neck on Nov. 14 while 9 White-wings were at Hart-Miller on Oct. 19 (Ringler +). Czaplak estimated 3200 scoters flying past Ocean City on Oct. 12-14 with the birds divided nearly equally between Blacks and Surfs

while only 2 White-wings seen. On Nov. 14 Warfield estimated 16,000 scoters passing Assateague in 81 flocks with other species such as Black Ducks, Blue-winged Teal, Red-breasted Mergansers, Brant and Double-crested Cormorants mixed in with them. Of the scoters only about 20 were identified as White-wings. High counts of Common Goldeneyes were 62 in Allegany County (48 at North Branch and 14 at Rocky Gap) on Nov. 12 (Simons) and 450 at Hodges Bar off Kent County on Nov. 14 (Gruber). An exceptionally early drake Bufflehead was at Hart-Miller on Sept. 28 (Ringler +) while flocks of 70 at Leading Point on Nov. 20 (Wilkinson), 50 in DC on Nov. 21 (Czaplak) and 150 off Mockley Point on Nov. 24 (Nistico) were the best reported. Early Hooded Mergansers were 1 at North Branch on Sept. 22 (Simons) and 2 at Hart-Miller on Oct. 11 (Blom); at Loch Raven there were 18 on Oct. 31 and 64 on Nov. 17 (Simon). A summering Common Merganser was at Hart-Miller on Aug. 11 (Ringler +) and early migrants were at Piscataway on Oct. 26 (Nistico) and 17 at Loch Raven on Oct. 29 (Simon). Teresa Simons also found 5 Red-breasted Mergansers at Rocky Gap on Oct. 11 and an early Ruddy Duck on Sept. 22 at North Branch. Other early Ruddies included 16 at Hughes Hollow on Oct. 4 (Bonham) and 7 at Georgetown Reservoir on Oct. 7 (Czaplak). Nistico estimated 150 off Mockley Point on Nov. 24.

Table 2. Hawk Migration at Monument Knob, Washington Monument State Park, Fall 1985

Species	First	Last	Total	Biggest Days
Osprey	8/17	11/6	115	13 on 9/28, 9 on 9/12 and 9/29
Bald Eagle	8/24	12/3	5	2 on 9/5, also 1 on 9/1
Northern Harrier	8/27	12/3	113	13 on 11/9, 8 on 10/12, 6 on 11/15
Sharp-shinned Hawk	8/17	12/3	2065	217 on 10/8, 199 on 9/26, 152 on 10/9
Cooper's Hawk	9/12	11/9	74	6 on 10/6 and 10/19, 5 on 9/30
Northern Goshawk	9/30	12/3	4	2 on 12/3, also 1 on 11/8
Red-shouldered Hawk	8/31	11/24	110	21 on 10/25, 20 on 10/26, 9 on 10/29
Broad-winged Hawk	8/17	10/25	1676	899 on 9/18, 300 on 9/12, 86 on 9/19
Red-tailed Hawk	8/22	12/3	1039	131 on 10/25, 94 on 12/3, 91 on 11/15
Rough-legged Hawk	11/19		1	
Golden Eagle	10/25	12/3	3	also 1 on 10/29
American Kestrel	8/28	11/24	56	12 on 10/6, 6 on 10/5, 5 on 9/28
Merlin	10/7	10/9	3	also 1 on 10/8
Peregrine Falcon	9/9	10/19	4	2 on 10/19, also 1 on 10/6
Unidentified			277	
Total	8/17	12/3	5545	942 on 9/18, 358 on 9/12, 238 on 10/8
Hours, 403				

Vultures, Hawks. See Table 2 for the report from the hawk watch at Monument Knob. Sam Dyke saw 12 Black Vultures at Fairmount WMA on Nov. 27 and Engle estimated 400 Turkey Vultures drifting south over Dover Bridge on Sept. 30. Murphy reported 17 Ospreys migrating past Fort Smallwood on Aug. 31. The following represent late occurrences for Ospreys at each location: 1 near Parkton in northern Baltimore County on Oct. 23 (Wilkinson), 1 at Denton on Oct. 27 (Short), 1 at Seneca on Oct. 30 (Warfield), 1 in Howard County on Nov. 9 (Solem, Farrell), 2 at Loch Raven on Nov. 11 (Simon), 1 at Point Lookout on Nov. 16 (M. O'Brien) and 1 at Little Creek in Somerset County on Nov. 23 (Dyke). Interesting reports of Bald Eagles were 1 immature at Fort Smallwood on Aug. 31 (Murphy), an immature at Hart-Miller on Oct. 5 and 3 birds at Whitehaven in Wicomico

County on Oct. 14 (both Ringler +), an adult in DC on Oct. 16-19 (Czaplak), an adult at Loch Raven Nov. 8-29 (Simon +) and 1 at Williston on Nov. 28 (Short). The first migrant Northern Harriers were 1 at Damsite on Aug. 23 (Gruber) and 1 at Pinto Marsh on Sept. 1 where there were 5 on the 7th (Simons). A high count of 23 Harriers was near Bestpitch in Dorchester County on Oct. 27 (M. O'Brien). There were several reports of early migrant Sharp-shinned Hawks beginning with 1 that was banded at Mt. Nebo on Aug. 24 and 1 seen in DC on Aug. 26 (Czaplak), followed by 1 at Pinto Marsh on Sept. 7 (Simons), 2 at Remington Farms on Sept. 8 (Armistead) and 2 at Kent Point on the latter date (Wilkinson). The Bogdans saw 17 Sharp-shins flying over Ilchester on Sept. 15 and Solem and Farrell saw 11 migrating over other parts of Howard County the same day. The only Northern Goshawks reported were migrants at Monument Knob. The Bogdans also caught the major flight of Broad-winged Hawks over the Piedmont on Sept. 15 with 1063 at Ilchester. Simons counted 729 Broad-wings at Town Hill on Sept. 12 (and also saw an apparent albino at Dickerson Hollow that day). Wilkinson saw 7 Broad-wings at Kent Point on Sept. 14 and Czaplak reported a very late individual on Nov. 10 at Montrose Park in Georgetown. The first Rough-legged Hawk report was at Deal Island WMA on Nov. 6 (Walbeck) followed by 1 in DC on Nov. 22 (Czaplak), a light-phase bird in southern Frederick County on Nov. 23 (Anderson) being joined by a dark-phase individual on the 28th (M. O'Brien) through the end of the month, 1 in Howard County on Nov. 23 and later (M. Wallace), 1 on Quaker Neck in Kent County on Nov. 26 (Gruber), 1 at Elliott on Nov. 28 (Ben Yokel) and 2 (1 each light and dark) near Bestpitch on Nov. 29 (M. O'Brien). In addition to the Golden Eagles seen at Monument Knob single birds were reported at Loch Raven on Oct. 27 (Simon), Conowingo on Nov. 12 and later (Schutsky +), an adult in southern Frederick County on Nov. 23 (Anderson) and an immature at Blackwater on Nov. 23 (Gary Nelson).

Falcons. American Kestrels drew little comment but Engle noted 8 at American Corner in Caroline County on Aug. 7 attesting to the early migrant status of this species. Murphy counted 26 Kestrels passing Fort Smallwood on Aug. 31. Merlin reports were 1 at Rockville on Sept. 23 (M. O'Brien), 1 on Kent Island on Oct. 5 (Czaplak, Greg Gough), 5 on Assateague on Oct. 12 (M. O'Brien +), 1 at Hurlock on Oct. 14 (Hammers, Wilkinson) and 1 near Bellevue on Nov. 8-9 (Armistead +). Scott Ward conducted the 16th consecutive year of banding of Peregrine Falcons on Assateague this fall. A total of 552 Peregrines were observed and 147 were captured during the season. Of these, 8 Peregrines had been previously banded. This is the second highest total captures for the 16 years. Other Peregrine reports were 1 at Tower Gardens on Kent Island on Aug. 25 (Ringler, Blom, Ricciardi) which probably had wandered from the nearby Bay Bridge nest site, an adult at Hart-Miller on Oct. 5 (Kaestner +), 1 at Back River on Oct. 6 (Wilkinson, Hammer) perhaps the same as the previous bird, and 1 at Blackwater from Oct. 27 (M. O'Brien) through at least Nov. 5 (Runkles, E. Willoughby).

Rails. The only Clapper Rail reported was 1 at Point Lookout on Nov. 16 (M. O'Brien). A King Rail was seen at North Beach on Sept. 12 (Betty Kraus). Dave Wallace saw 2 immature Virginia Rails at Lilypons on Oct. 13, a late record for the Piedmont. At least 1 Sora was at Rockville from Sept. 23 through Oct. 16 with 2 there on Oct. 5 (M. O'Brien). Another Sora was seen at Masonville on Oct. 5 (Ringler). A Common Moorhen was still at Summit Hall on Aug. 6 (M. O'Brien), Armistead found 3 at Deal Island WMA on Sept. 21, 1 was at West Ocean City on Oct. 19 (M. O'Brien) and 1 was at Sparrows Point in Baltimore County on Nov. 2 (Ringler). O'Brien also saw 1 American Coot on Aug. 13 at Deal Island WMA where the species

has bred. Early migrant coots were 1 at Brandon Shores on Sept. 22 (Wilkinson) and 3 at Piney Run on Sept. 29 increasing to 160 on Nov. 23 (Ringler +). At Loch Raven Steve Simon counted 21 coots on Oct. 8, 133 on Nov. 10 and 165 on Nov. 22 while Connie Skipper estimated 300-500 on Deep Creek Lake from Nov. 15-26 and Nistico estimated 1000 at Mockley Point on Nov. 24.

Plovers, Oystercatchers, Stilts. Inland Black-bellied Plovers were 1 in breeding plumage at Liberty on Aug. 19 (Ringler), 1 at Rockville on Oct. 4 (M. O'Brien), 1 in DC on Oct. 19 (Czaplak) and 2 at Fort McHenry on Nov. 2 (Ringler). Other records were birds at Deal Island WMA from Aug. 6 through Oct. 2 (Walbeck), 52 at Ocean City on Sept. 22 (M. O'Brien), 1 at North Beach on Sept. 28 (Kraus) and 3 at Blackwater on Nov. 5 (Runkles, E. Willoughby) and 1 there on Nov. 29 (M. O'Brien). Lesser Golden-Plovers were widespread in small numbers this fall, with 10 counties plus DC being represented beginning with 2 at Green Manor Turf Farm south of Sykesville on Aug. 31 through Sept. 2 (Mudd +) being a first for Howard County. Others were 13 at Summit Hall Turf Farm on Sept. 11 with a maximum of 16 on the 28th (M. O'Brien) and 5 remaining on Oct. 4 (Bonham), 2 at Hart-Miller on Sept. 12 (Ringler, Kaestner), 3 at Liberty on Sept. 13 with 2 remaining on the 22nd (Ringler +), 2 at Blackwater on Sept. 21 (Armistead, Gus Daniels), 17 at Deal Island WMA on Sept. 21 (Armistead), 8 in DC on Sept. 22 with 1 remaining on Oct. 4 (Czaplak), 1 at Ocean City on Sept. 22 (M. O'Brien) with 5 there on Oct. 5 (Warfield), 4 at Loch Raven on Sept. 22 (Simon), 2 at North West Creek on Kent Island on Sept. 22 (Ringler, Ricciardi, Carol McCollough) with 2 there on Oct. 28 (Mudd), 10 at Sandy Point on Oct. 5 (Gough), 1 on Assateague on Oct. 12 (M. O'Brien) and 2 at Lilypons on Oct. 13 (D. Wallace). Semipalmated Plovers remained at Deal Island WMA through Oct. 10 (Walbeck) and a very late bird was at New Road Landing in Wicomico County on Nov. 3 (Mudd). The only reports of Piping Plovers from Assateague were 13 on Aug. 2 and 4 on Aug. 13 (M. O'Brien). The first Piping Plover in Maryland away from the coast or the bay was reported at Loch Raven on Sept. 27, discovered by Steve Simon and seen later by Bob Dixon. High counts of Killdeer were 117 at Summit Hall on Aug. 4 (Hilton) increasing to 161 on Sept. 11 (M. O'Brien), 62 at Lilypons on Oct. 19 (D. Wallace), 52 at Pinto on Nov. 17 (Simons), 105 at Liberty on Nov. 17 (Ringler) and 100 at Greensboro on Nov. 23-24 (Fletchers). There were 26 American Oystercatchers at Ocean City on Sept. 22 (M. O'Brien), a typical number there in recent years. The last Black-necked Stilt reports from Deal Island WMA were 2 on Aug. 13 (M. O'Brien) and 1 on Aug. 17 (Hayes). The only American Avocets seen this fall were 2 at Hart-Miller on Aug. 15 (Ringler +).

Sandpipers. A late Greater Yellowlegs was at inland Loch Raven on Nov. 29 (Simon). High counts of Lesser Yellowlegs were 36 at North Branch on Aug. 25 (Simons), 60 at Liberty on Aug. 25 (Blom, Ringler) and 300 at North West Creek on Aug. 25 (Blom +) with a late bird being at Lake Needwood in Montgomery County on Nov. 9 (Hammer). Late Solitary Sandpipers were 1 in Howard County on Oct. 6 (Farrell, Solem), 1 on Newton Neck in St. Marys County on Oct. 8 (Wilson) and 2 at Ashland near Loch Raven on Oct. 25 (Simon). A surprising 11 Willets, all judged to be the western race by size, plumage and call, were at Liberty on Aug. 25 (Blom, Ringler) while others were at Hart-Miller and the latest bird for the season was at Ocean City on Nov. 29 (M. O'Brien). Late Spotted Sandpipers were single birds at Piscataway on Oct. 25 (Nistico), Leading Point in Baltimore on Nov. 2 (Ringler, Blom, Ricciardi) and at New Road Landing on Nov. 3 (Mudd). Upland Sandpipers were reported sparingly with 7 in southern Frederick County on Aug. 4 (P. O'Brien), 1 at Sandy Point on Aug. 7 (M. O'Brien), 3 there on the 13th (Jack Schultz)

and 4 on Tilghman Island on Sept. 15 with 1 remaining on the 22nd (Reese). The only Whimbrel away from Hart-Miller was 1 on Assateague on Aug. 13 (M. O'Brien). Czaplak saw 1 Hudsonian Godwit at Anacostia on Sept. 27 and Sumner saw 14 circling over Beltsville on Oct. 4 but the latter flock decided not to land and flew off. A Marbled Godwit was at Hart-Miller on Aug. 11 (Blom +), 1 on Assateague on Aug. 13 with 1 there on Oct. 12 and 5 on Oct. 19 (M. O'Brien +) and 4 at Ocean City on Oct. 12-13 (Czaplak +) perhaps these being the birds that were later seen at Assateague. Unusual in DC was a Ruddy Turnstone near the Naval Research Lab on Sept. 27 (Czaplak). The first inland Maryland record of Red Knot was 1 in breeding plumage at Liberty on Aug. 19 (Ringler) another at an unusual location was at North West Creek on Sept. 6 (Klockner). At Assateague there were 20 knots on Aug. 13 (M. O'Brien) and 13 on Oct. 12 (Czaplak +).

Rare inland were 3 Sanderlings at Liberty on Sept. 21 (Ringler). Interesting reports of Semipalmated Sandpipers were 12 at Point Lookout on Aug. 1 (Wilson), 100 at Dover Bridge on Aug. 31 (Engle) and 2 late birds at Blackwater on Nov. 5 (Runkles, E. Willoughby). A Western Sandpiper was at Loch Raven on Aug. 12 and 31 (Simon) and late birds were 3 at North Branch on Nov. 16 (Simons) and 15 at Blackwater on Nov. 30 (Armistead +). Walbeck reported Least Sandpipers at Deal Island WMA through Oct. 17, the high count at Liberty was 30 on Aug. 22 (Ringler) and 20 late birds were at Blackwater on Nov. 29 (M. O'Brien). There were 3 White-rumped Sandpipers at Liberty on Sept. 29 (Ringler) with 2 remaining the next day (Wilkinson) and very late were 3 at Blackwater on Nov. 29 (M. O'Brien). Baird's Sandpipers were very scarce this year with singles at Liberty on Aug. 25-26 (Blom, Ringler, Wilkinson) and 1 at North Beach on Sept. 12 and 30 (Kraus). Interesting reports of Pectoral Sandpipers included 12 at Point Lookout on Aug. 1 (Wilson), 8 in DC on Sept. 27 (Czaplak), 15 at North Branch on Oct. 4 (Simons), 4 at New Road Landing on Nov. 3 (Mudd) and 1 at Hooper Island and 6 at Blackwater on Nov. 9 (Armistead +). An early Dunlin was on Assateague on Aug. 13 (M. O'Brien), another was in DC on Oct. 20 (Czaplak), 20 at New Road Landing on Nov. 3 (Mudd) and an estimated 1000 at Blackwater on Nov. 29 (M. O'Brien). The first confirmed record of Curlew Sandpiper in Maryland was 1 at Hart-Miller on Oct. 19 (Kaestner +), which will be reported more fully in a separate article.

Approximately 175 Stilt Sandpipers remained at Hart-Miller through Aug. 15 (Ringler), this by far the most reported in the state. Continuing the superb year for Stilt Sands were 2 at point Lookout on Aug. 1 (Wilson), 29 at Deal Island WMA on Aug. 13 (M. O'Brien), 22 at Sandy Point on Aug. 25 (Klockner) and a record-high inland count of 10 at Liberty on the latter date (Blom, Ringler). All the Buff-breasted Sandpipers this fall were single birds within an 11-day period with 1 at Hart-Miller on Sept. 12 (Kaestner, Ringler) 1 at Leading Point on Sept. 15-16 (Wilkinson, Hammer) and 1 at Liberty on Sept. 22 (Mudd, Ringler). There were 3 Short-billed Dowitchers at Point Lookout on Aug. 1 (Wilson), 1 at Greenbelt Lake on Sept. 22 (Jack Wennerstrom) and 1 in DC on Sept. 27 (Czaplak) in addition to the birds reported at Liberty and Hart-Miller. Long-billed Dowitchers were reported as follows: 1 at Liberty on Oct. 13 (Mudd), 4 at Blackwater on Oct. 5 (Czaplak, Gough) increasing to 19 on Oct. 27 (M. O'Brien) and 2 remaining on Nov. 30 (Armistead +) and 1 in DC on Oct. 23 (Czaplak). Early Common Snipe were 1 at North Branch on Aug. 25 (Simons) and 1 at Deal Island WMA on Sept. 7 (Walbeck). It was an exceptional year for Wilson's Phalaropes beginning with 2 at Deal Island WMA on Aug. 2 (M. O'Brien) and 1 at Martingham in Talbot County on Aug. 10 (Reese). The prime spots for this species were North West Creek with a peak of 10 on Aug. 31 (Blom, Ringler, Ricciardi) and Hart-Miller with a high of 6 on

Oct. 11 (Ringler +). The latest away from the latter site was 1 at Hurlock on Oct. 14 (Hammer +). This is the greatest appearance by Wilson's Phalaropes in Maryland with record-high counts established. Red-necked Phalaropes, which are rarely reported from land in Maryland, were also well-represented though only by single birds at Deal Island WMA on Aug. 13-19 (M. O'Brien, Hammers), North West Creek on Aug. 28 (Wilkinson, Hammer) and Hart-Miller on Sept. 12 (Kaestner, Ringler).

Jaeger, Gulls. A Parasitic Jaeger roamed the Potomac River in the DC area from Sept. 7 through Oct. 21 (Czaplak +). High counts of Laughing Gulls were 140 in DC on Aug. 31 (Czaplak), 500 on Newton Neck in St. Marys County on Sept. 3 (Wilson), 300 remaining at Back River on Nov. 24 (Ringler) and 225 still at Blackwater on Nov. 30 (Armisteads). Inland Laughing Gulls were at Loch Raven, Oct. 10-27, with 48 there on the 25th being the most ever seen inland in the state (Simon), 6 at Lake Kittamaquidi on Oct. 27 (Farrell, Solem) and 2 at Beltsville on Nov. 3 (Ringler). An adult Franklin's Gull was reported at Loch Raven on Oct. 27 (Kaestner +), a first for the Piedmont. Simon found 3 Bonaparte's Gulls at Loch Raven on Oct. 26 and 2 there the next day, 1 was at the Mountain Lake sewage lagoons on Nov. 16 (Skipper) and 34 off Love Point on Nov. 26 (Gruber). Czaplak's high counts in DC were 1000 Ring-billed Gulls on Sept. 27 and 1300 Herring Gulls on Nov. 9. A Herring Gull at Oldtown on Oct. 4 (Simons) was rare for western Maryland and an estimated 8000 Herring Gulls were near Salisbury on Nov. 29 (M. O'Brien). In addition to the Lesser Black-backed Gulls at Hart-Miller the DC bird returned for its sixth winter starting on Sept. 27 when it was seen at Hains Point (Czaplak), and the Fort McHenry bird returned for its eighth winter from Oct. 5 (Ringler). Other Lesser Black-backs were an adult at Ocean City on Oct. 12 (Czaplak), an adult at North Beach on Nov. 1 (Stasz), 2 adults at West Ocean City and 3 (an adult and 2 near-adults) near Salisbury all on Nov. 29 (M. O'Brien). At the latter site O'Brien also found an immature Glaucous Gull on Nov. 29. Reports of Great Black-backed Gulls on Oct. 8 were 1 at Loch Raven (Simon) and 71 at Point Lookout (Wilson). The surprise gull of the season was an immature Black-legged Kittiwake photographed at North Beach on Nov. 1 by Stasz.

Terns, Skimmers. The only report of Gull-billed Tern was 1 at Assateague on Aug. 13 (M. O'Brien). The peak count of Caspian Terns at Hart-Miller was 400 on Oct. 5 (Ringler +); other sightings included 15 at Sandy Point on Aug. 25 (Klockner), 30 in DC on Sept. 21 with 1 late bird there on Nov. 7 (Czaplak) and 1 at Hooper Island on Nov. 9 (Armistead +). Though Royal Terns are not regular breeders in the state they have been wandering north in increasing numbers in recent years and have also been staying later into the early winter. St. Marys County being the closest to any breeding colonies gets the lion's share of the Royal Terns and Wilson counted 86 there (5 at Point Lookout and 81 at Point No Point) on Sept. 3; other counts at Point Lookout were 45 on Aug. 24 (Ringler), 40 on Oct. 6 and 23 on Nov. 16 (M. O'Brien). In Calvert County there were 35 at Chesapeake Beach and 2 at Cove Point on Aug. 24 (Ringler) and 33 at Chesapeake Beach on Nov. 11 (Stasz). Farther north in the bay Royals numbered 2 at Sandy Point on Aug. 25 (Klockner), and peaked at 8 at Hart-Miller on Oct. 5 (Ringler +), 10 near Bellevue on Oct. 13 (Armistead) and 6 at Rock Hall on Nov. 1 (Gruber). Other sightings were 45 at Ocean City on Oct. 13 (Ringler +) and 5 at Hooper Island on Nov. 9 (Armistead +). On the coast 2 Sandwich Terns were seen at Assateague on Aug. 2 (M. O'Brien) and 6 at Ocean City on Aug. 10 (Sumner); an extraordinary 7 were at Scotland Beach in St. Marys County on Aug. 24 and later (Ringler +) and 1 at Tilghman Island on Oct. 6 (Don Meritt).

The high count of Common Terns was 250 in the Point Lookout-Scotland Beach area on Aug. 24 (Ringler). Late Common Terns were 2 on an Ocean City pelagic trip on Sept. 21 (Naveen +), 1 at Matapeake on Sept. 22 (Ringler), 1 near Bellevue on Oct. 12 (Armistead), 1 at Ocean City on Oct. 13 (Ringler +) and 2 at Chesapeake Beach on Nov. 11 (Stasz). This species typically departs in large numbers in early September leaving very few stragglers. Large numbers of Forster's Terns congregate throughout the bay region after the breeding season. Non-breeders begin arriving at these sites in June and are soon joined by juveniles and adults from nearby colonies. High counts of Forster's Terns this fall were 1000 at Hart-Miller on Aug. 15 (Ringler +), 310 at Bivalve on Aug. 19 (Hammers), 500 at Hooper Island on Sept. 8 and 175 still there on Nov. 9 (Armistead +), 200 at Sandy Point on Oct. 5 (Czaplak, Gough), 250 in St. Marys County (24 at Point Lookout, 213 at Tanner's Creek, 13 at Point No Point) on Oct. 8 (Wilson), 461 at Rock Hall on Nov. 1 (Gruber), 50 near Bellvue on Nov. 10 (Armistead), 222 at Chesapeake Beach on Nov. 11 (Stasz) and 275 at Point Lookout on Nov. 16 (M. O'Brien). Other reports of Forster's Terns were 8 at Hog Island Marsh in Caroline County on Aug. 1 (Engle), 1 at Lilypons on Oct. 5 (D. Wallace) and 9 in DC on Nov. 8 (Czaplak). The only Black Terns reported away from Hart-Miller were 8 (5 adults and 3 immatures) at Hodges Bar on Aug. 15 (Gruber) and 1 at Piney Run in Carroll County in September (Mudds). Armistead estimated 40 Black Skimmers at Hooper Island on Sept. 8 and other reports in the bay region were 1 adult at Sandy Point on Oct. 13 (Klockner) and Nov. 24 (Hammer +), 2 immatures in DC on Oct. 24 (Czaplak) and 2 at Point Lookout on Nov. 16 (M. O'Brien). At Ocean City 275 skimmers remained on Oct. 13 (Ringler +).

Cuckoos, Owls. A Black-billed Cuckoo, rarely reported in fall migration, was banded on Sept. 13 at St. Timothy's. Czaplak noted his first migrant Yellow-billed Cuckoos with 2 in DC on Aug. 17. Short-eared Owl reports began with the first at Deal Island WMA on Oct. 20 (Walbeck) followed by 1 at Masonville on Nov. 23-24 (Ringler +) and 2 at Elliott on Nov. 28 (Ben Yokel). A Northern Saw-whet Owl was banded on Oct. 14 at Damsite and another on Nov. 9 at Laurel.

Goatsuckers. Early migrant Common Nighthawks were 1 at Lyons Creek in Anne Arundel County on Aug. 10 (Ringler +) and 1 at Woodlawn in Baltimore County on Aug. 14 (Wilkinson). High counts of nighthawks were 30-50 near Glenelg on Aug. 27 (McClures), 153 in DC on Aug. 30 and 50 still present on Sept. 23 (Czaplak), 700 at Beltsville on Aug. 30 and 900 at Lanham on Sept. 2 (Murphy), 1139 at Rockville on Sept. 2 (Bob Augustine), and 60-80 near Mt. Airy in Howard County on Sept. 3 (Orgain). Single late nighthawks were in Howard County on Sept. 24 (Harvey), near Catonsville on Sept. 28 (Wilkinson) and an extraordinary and controversial individual was seen by many observers in DC from Oct. 29 through Nov. 15 (Czaplak +). The latter was thought at first to be another species, but color photographs later revealed its true identity as an adult female Common Nighthawk (see *Birding* 18 (3): 169-173). A Chuck-will's-widow, a bird not often netted, was banded at Damsite on Aug. 13 and single Whip-poor-wills were also banded there on Sept. 12 and 14.

Swifts, Hummingbirds, Kingfishers, Woodpeckers. The high count of Chimney Swifts reported was 200 at Lake Needwood on Oct. 7 (M. O'Brien), and the latest was in Frederick on Oct. 22 (D. Wallace). The first migrant Ruby-throated Hummingbird noted was 1 in DC on Aug. 17 (Czaplak) and late birds were 1 banded at Damsite on Oct. 4 and a very late bird in Denton on Oct. 23 (Nuttie). Reese found 10 Belted Kingfishers at Tilghman Island on Aug. 18, an unusually large number

for that date. An immature Red-headed Woodpecker, certainly a migrant, was in DC on Sept. 28 where 19 was the high count of Common Flickers on Sept. 29 (Czaplak).

Flycatchers, Larks. Olive-sided Flycatcher reports this fall were 1 in DC on Aug. 17 (Czaplak), 1 at Laurel on Aug. 31 (Murphy), 2 at Summit Hall on Sept. 15 (George Jett) and 1 at Seneca on Sept. 20 (M. O'Brien). Late Eastern Wood-Pewees were 1 at Denton on Oct. 12 (R. Fletcher) and 1 photographed at Patuxent River Park on Oct. 31 by Bill Portlock (see *American Birds*, 40 (1): 95). An incredible 33 Yellow-bellied Flycatchers were banded at Damsite between Aug. 23 and Oct. 4 with 12 on Sept. 14, and at Mt. Nebo another 14 were banded from Aug. 21 to Oct. 1. A very early Yellow-belly was banded at PWRC on Aug. 5, and at Adventure 19 were banded from Aug. 16 through Sept. 30. Despite these impressive banding statistics very few were seen in the field; 1 at Tower Gardens on Aug. 31 (Blom, Ringler, Ricciardi), 1 at Rockville on Sept. 11 (M. O'Brien) and 2 at Point Lookout on Sept. 14 (M. O'Brien, Gough) were the only ones reported. An extraordinarily late Least Flycatcher was banded at Adventure on Oct. 22. A tardy Western Kingbird was seen at Eastern Neck on Nov. 3 (Droege, Murphy). The only high count of Eastern Kingbirds noted was 18 at Centennial Lake in Columbia on Aug. 17 (Solem, Farrell); 3 late migrants were at Elliott on Sept. 8 (Armistead) and an extraordinarily late 1 was at Rockville on Oct. 5 (M. O'Brien). The Horned Lark flock in southern Frederick County peaked at 300 on Nov. 17 (M. O'Brien).

Swallows. Solem and Farrell estimated 125 Purple Martins at Centennial Park on Aug. 17 and a late 1 was also in Howard County on Sept. 15 (Chestem). High counts of Tree Swallows were 2000 at Blackwater on Sept. 8 (Armistead), 100 at Riverside on Sept. 15 (Ringler, Hammers), 168 in St. Marys County on Oct. 8 (Wilson) and 3543 near Vienna on Oct. 27 (M. O'Brien); late birds were 5 at Federalsburg on Oct. 29 (Fletchers) and 1 at Eastern Neck on Nov. 10 (Harvey). Late Northern Rough-winged Swallows were singles at Lilypons on Nov. 11 (D. Wallace), along New Design Road in southern Frederick County on Nov. 17 (M. O'Brien) and at Piscataway on Dec. 1 (Nistico). Armistead estimated 140 Bank Swallows at Blackwater on Sept. 8. Migrant Cliff Swallows, which are rarely seen, were 1 at Remington Farms on Aug. 10 (Hammers), 11 at Pinto on Aug. 25 (Simons), 1 at Tower Gardens on Aug. 31 (Ringler) and 3 in southern Dorchester County on Sept. 8 (Armistead). Late Barn Swallows were numerous this fall with single birds spotted at Sandy Point on Oct. 12 (Nistico), Berlin on Oct. 13 (Ringler +), Easton on Oct. 14 (Ringler +), Blackwater on Oct. 19 (M. O'Brien), in Howard County on Oct. 24 (M. Wallace) and near Madonna on Oct. 29 (Kirkwood).

Corvids, Nuthatches. The only report of migrant Blue Jays was 200 at Mt. Nebo on Sept. 28 (Skipper). Armistead's estimates of Fish Crows near Bellevue were 500 on Oct. 12 and 26, and 300 on Nov. 10. Red-breasted Nuthatches moved into the state in late August, and most of the early reports belong to the Hammers and Wilkinson. Together they found single birds on South Mountain in Frederick County and along the Potomac in Washington County on Aug. 31, 2 at Wolf Swamp on Sept. 1 and 1 at Dan's Rock on Sept. 2. Earlier the Hammers got 3 at Janes Island State Park on Aug. 23 and Wilkinson saw 1 at Back River on Aug. 25. The only other August reports were single birds on the 29th at Harford Glen (Kirkwood) and Denton (Nuttie).

Creeper, Wrens. A Brown Creeper at Summit Hall on Aug. 6 (M. O'Brien) was probably from a nesting area nearby on the C & O Canal. A probable breeding

Sedge Wren was at Deal Island WMA on Aug. 8 (P. O'Brien) and 5 were in for the winter at Irish Grove on Nov. 16 (Swift). Migrant Marsh Wrens were single birds in DC on Sept. 14-28 (Czaplak), at Rockville on Oct. 23 (M. O'Brien) and at Lilypons on Nov. 11 (D. Wallace).

Kinglets, Gnatcatchers, Thrushes, Thrashers. An estimated 60 Golden-crowned Kinglets were at Sandy Point on Oct. 12 (Nistico +). Late Blue-gray Gnatcatchers were 4 at Pinto on Sept. 9 (Simons) and 1 in DC on Sept. 15 (Czaplak). An early Veery was at Damsite on Aug. 19 (Gruber) where the last 1 was banded on Oct. 4, and another late Veery was in Greensboro on Oct. 2 (Hewitt). Armistead banded 2 Gray-cheeked Thrushes near Bellevue on Sept. 28 and saw 8 there the next day. At Adventure a previously banded Gray-cheek repeated in the nets on the very late date of Oct. 26. The first Swainson's Thrushes of the season were banded at Adventure on Aug. 17 and 21, and at Mt. Nebo on Aug. 22. Armistead estimated 60 near Bellevue on Sept. 29, and the last of the season was 1 in DC on Oct. 28 (Czaplak). An early migrant Hermit Thrush was banded at Mt. Nebo on Sept. 28 and a very late Wood Thrush was banded at Adventure on Oct. 25. Czaplak estimated 145 American Robins in DC on Nov. 9 and saw a late Gray Catbird there on Nov. 10 and a late Brown Thrasher on Nov. 18. Connie Skipper also found a late Brown Thrasher, but in Garrett County at Turkey Neck on Nov. 15.

Pipits, Waxwings, Shrike. An extraordinarily early Water Pipit in breeding plumage was at Hart-Miller on Sept. 12 (Kaestner, Ringler) and another was at Rockville on Sept. 24 (M. O'Brien). Flocks of pipits were 100 near Madonna in October and later (Kirkwood), 40 at Liberty Reservoir on Oct. 20 (Ringler), 40-50 at Bray Hill on Oct. 30 (Skipper) and 150 in southern Frederick County on Nov. 28 (M. O'Brien). A Cedar Waxwing banded at St. Timothy's on July 29 may have been an early migrant or a representative post-breeding dispersal bird. Other early migrants were 1 near Bellevue on Aug. 10 (Armistead) and 2 at Liberty on Aug. 22 (Ringler). Armistead's waxwing count near Bellevue on Nov. 10 was 200. The only migrant Loggerhead Shrike reported was at Pinto Marsh on Aug. 30 (Simons).

Vireos. Late Solitary Vireos were 6 at Pinto Marsh on Oct. 19 and 1 at North Branch on Oct. 24 (Simons), 1 that repeated in the nets at Adventure on Oct. 25, and 1 at Bray Hill on Nov. 5 (Skipper). A late Warbling Vireo was banded at Adventure on Sept. 24. The first Philadelphia Vireo report was 1 at Violet's Lock on Sept. 7 (Stephen Jones) followed by 1 in DC on Sept. 15 (Czaplak) and another at Violet's Lock on Sept. 17 (M. O'Brien). Bandings of Philadelphia Vireos at Mt. Nebo numbered 7 from Sept. 17 through Oct. 12 and Adventure banded 2 on Sept. 20. Late bandings of Red-eyed Vireos were on Oct. 12 at Adventure and Lyons Creek, and Oct. 18 at St. Timothy's.

Early Warblers. Early migrant warblers were 2 Blue-winged Warblers banded at Damsite on Aug. 13, a Chestnut-sided Warbler in DC on Aug. 17 (Czaplak) and another at Granite in Baltimore County the next day (Ringler), 2 Magnolia Warblers in DC on Aug. 15 (Czaplak), single Cape May Warblers banded at PWRC on Aug. 24 and Mt. Nebo on the 25th and another seen on Kent Island on the 28th (Wilkinson, Hammer), a Black-throated Blue Warbler banded at PWRC on Aug. 22, a Palm Warbler banded at Adventure on Sept. 5 and 3 seen at Pinto Marsh on the 7th (Simons), a Black-and-white Warbler banded at PWRC on Aug. 4 along with an American Redstart and an Ovenbird, another Black-and-white at Piney Run on Aug. 10 and another Redstart in Carroll County on Aug. 3 (Harvey), a Redstart and an Ovenbird banded at Damsite on Aug. 12, Wilson's Warblers banded at Mt. Nebo on

Aug. 22 and St. Timothy's on Aug. 26, and a Canada Warbler banded at Damsite on Aug. 12.

The only Golden-winged Warblers reported were bandings at PWRC on Aug. 31 and Mt. Nebo on Sept. 8. The Mt. Nebo station also took top honors for Tennessee Warblers by banding 134 between Aug. 21 and Oct. 9. Orange-crowned Warbler reports were single bandings at Adventure and PWRC on Oct. 8, 1 at Rockville on Oct. 22 (M. O'Brien) and 1 at Masonville from Nov. 23 through Dec. 7 (Wilkinson +). High counts of Palm Warblers were 4 on Kent Island on Sept. 14 (Wilkinson, Hammer) and 8 on Assateague on Oct. 12 (Czaplak +). The extreme dates for Connecticut Warbler were both bandings at PWRC—on Aug. 28 and Oct. 14. Other banded Connecticut Warblers were 10 at Adventure, Sept. 5-29, 3 at Mt. Nebo, Sept. 6-26, 2 at St. Timothy's on Sept. 22 and Oct. 1 and others at Lyons Creek from Sept. 6 through Oct. 13. Only 3 observations of Connecticut Warblers were made beginning with an early 1 at Mt. Nebo on Aug. 31 (Skipper), 1 in Hazen Park in DC on Sept. 18 (Czaplak) and 1 at Sandy Point on Oct. 13 (Klockner). The Mt. Nebo station covered the spread on Mourning Warblers by banding 12 between Aug. 21 and Oct. 9 while 6 were banded at Damsite from Aug. 23 to Sept. 14 (3 on Sept. 12), 2 at Adventure on Sept. 25 and 28, and others at PWRC, Sept. 7-25. The only sightings of Mourning Warblers were 1 at Rockville on Sept. 24 (M. O'Brien) and 1 at Lake Roland on Oct. 5 (Harvey).

Late Warblers. The mild weather during the second half of the season is probably responsible for the great number of warblers recorded on late dates. Blue-winged Warblers were banded at Mt. Nebo on Sept. 11, Lyons Creek on Sept. 14 and Damsite on Sept. 23, and an exceptionally late male was seen in DC on Sept. 29 (Czaplak). Late Tennessee Warblers were banded on Oct. 19 at PWRC and Oct. 25 at St. Timothy's. Late Nashville Warblers were banded on Oct. 23 at Adventure and Oct. 25 at St. Timothy's. The last Northern Parulas were seen in Howard County on Oct. 11 (Harvey) and near Bellevue on Oct. 26 (Armistead). A late Yellow Warbler was in DC on Sept. 27 (Czaplak). The last Chestnut-sided Warbler was banded at PWRC on Oct. 11 and the last Magnolia Warbler on Oct. 18 there. Black-throated Blue Warblers were conspicuously tardy this fall and bandings occurred on Oct. 17 at Damsite, Oct. 18 at St. Timothy's, Oct. 23 at Adventure and Oct. 25 at PWRC. The last Yellow-rumped Warbler in Garrett County this fall was 1 at Bray Hill on Oct. 29 and 3 Black-throated Green Warblers were seen at Mt. Nebo on Oct. 10 (Skipper). October reports of Blackburnian Warblers were Charles County on the 1st (Nistico), banded at Lyons Creek on the 5th, 1 in DC on the 6th (Czaplak), and banded at Mt. Nebo on the 9th. The last Yellow-throated Warbler was seen on the C & O Canal on Sept. 15 (Gus Daniels). Rare any time in Garrett County was a Pine Warbler banded on Sept. 29 at Mt. Nebo. Other late reports of Pine Warblers were 7 on Newton Neck in St. Marys County on Oct. 8 (Wilson), 1 banded at PWRC on Oct. 18, and 1 seen at Back River on Nov. 24 (Ringler). Sept. 20 was very late for a Prairie Warbler in Garrett County banded at Mt. Nebo. Other late Prairies were 1 in DC on Sept. 29 (Czaplak) and 1 banded on Oct. 9 at PWRC. Late Palm Warblers were banded at PWRC on Oct. 25, 1 in DC on Nov. 28 (Czaplak) and 1 at Blackwater on Nov. 29 (M. O'Brien). A Blackpoll Warbler was seen at Oxon Hill on Oct. 25 (Nistico). A Black-and-white Warbler was banded on Oct. 16 at PWRC. An American Redstart was in DC on Oct. 20 and another was banded at Adventure on the 25th. The last Prothonotary Warbler reported was 1 at Federalsburg on Sept. 9 (Glime). Late Worm-eating Warblers were banded on Sept. 15 at PWRC and Sept. 17 at Adventure. Reese saw a late Ovenbird at Easton on Oct. 16. A Northern Waterthrush was banded on Oct. 7 at PWRC. A Common Yellowthroat was at Piney

Run on Oct. 20 (Harvey). A Hooded Warbler banded at Mt. Nebo on Sept. 25 was very late in Garrett County. Yellow-breasted Chats are usually gone by mid-September but 1 was banded at Lyons Creek on Oct. 5, 1 repeated in the nets at Adventure on Oct. 23, and 1 was in DC on Nov. 18 (Czaplak).

Tanagers, Emberizines. Summer Tanagers are rarely banded but 1 was caught at Lyons Creek on Sept. 14, and a late Scarlet Tanager was banded at Adventure on Oct. 12. The last Blue Grosbeaks were 1 banded at Damsite on Oct. 3 and 1 seen in Rockville on Oct. 25 (M. O'Brien). Indigo Buntings remained later than usual. After a high count of 25 at Rockville on Sept. 26 (M. O'Brien) birds were banded at Mt. Nebo on Oct. 12, Adventure and Damsite on Oct. 13, Lyons Creek on Oct. 17 and St. Timothy's on Oct. 25. The only Dickcissel report was 1 in Rockville on Oct. 4-5 (M. O'Brien).

Sparrows. The first American Tree Sparrow of the season was at Piney Run on Nov. 9 (Harvey). Simons estimated 50 Chipping Sparrows on Green Ridge on Oct. 4 at the peak of migration and a late individual was at Camp Hashawha in Carroll County on Nov. 29 (Harvey). Two reports of Clay-colored Sparrows were received, 1 in Rockville on Oct. 1-5 and the other on Assateague on Oct. 12 (both M. O'Brien +). Migrant Vesper Sparrows are rarely reported in the fall but 1 was at Leading Point on Oct. 20 (Wilkinson). Among the early Savannah Sparrows this year were 2 at Sandy Point on Sept. 8 and 1 in Rockville on Sept. 12 (M. O'Brien), 1 banded at St. Timothy's on Sept. 13 and 3 at Tower Gardens on Sept. 22 (Ringler +). Also among the migrants that are rarely reported in fall migration were a Grasshopper Sparrow in Rockville on Sept. 26 and a Sharp-tailed Sparrow there on Oct. 23-28 with 2 on the 25th (M. O'Brien). Early Fox Sparrows were 1 in Ocean City on Oct. 13 (Resch +) and 1 at Pinto on Oct. 18 (Simons). Lincoln's Sparrows were banded at PWRC from Sept. 10 through Oct. 17 and at Mt. Nebo from Sept. 15 through Oct. 10. Observations of Lincoln's Sparrows included 1 at Mt. Airy in Frederick County on Sept. 29 (Runkles), 6 at Pinto Marsh on Oct. 25 (Simons), 1 in DC on Oct. 26 and 15 at Rockville over the period of Sept. 17 through Oct. 23 with 4 on the former date (M. O'Brien). Early migrant Swamp Sparrows were 1 in DC on Sept. 15 and 1 banded at Adventure on Sept. 18; high counts were 15 at Pinto Marsh on Oct. 6 (Simons) and 67 at Rockville on Oct. 22 (M. O'Brien). An early White-throated Sparrow was seen at Mt. Nebo on Sept. 20 (Skipper) and the first was banded there two days later. Early White-crowned Sparrows were an adult at Rockville on Sept. 25 (M. O'Brien) and 1 near Bellevue on Sept. 29 (Armistead). An early Dark-eyed Junco was at Point Lookout on Sept. 14 (M. O'Brien).

Longspurs, Buntings. Lapland Longspurs were seen in southern Frederick County beginning with 2 on Nov. 17 and were present at least through Nov. 28 with 6 on that date (M. O'Brien +). The first Snow Buntings were 3 at Hart-Miller on Oct. 26 (M. O'Brien +) followed by 5 at Deal Island WMA from Oct. 30 through Nov. 14 (Walbeck) and 1 at Eastern Neck on Oct. 31 (Gruber). Others in November were 1 at Sandy Point on the 11th (Klockner), 5 in southern Frederick County on the 17th with at least 2 through the 24th (M. O'Brien) and 14 at Rock Hall on the 22nd (Gruber).

Icterines. The high count of Bobolinks was 160 in southern Dorchester County on Sept. 8 (Armistead) and a late 1 was at Rockville on Oct. 14 (M. O'Brien). Yellow-headed Blackbirds are being reported with increasing frequency in the state and this fall there were 2 at Blackwater on Oct. 19 (Don Merritt), an adult male at Belts-

ville on Oct. 28 through Nov. 2 (Sumner +), and a male at Fulton on Nov. 9 (Ches-tem) and Nov. 10 (Mudd). The only Rusty Blackbirds reported were an early 3 at Rockville from Sept. 29 through Oct. 1 (M. O'Brien), 4 in DC on Oct. 26 (Czaplak) and 6 were banded at Damsite on Nov. 2 where 3 Orchard Orioles were banded on Aug. 19. Barbara Ross found a Northern Oriole dead in her net at St. Timothy's on Nov. 20, apparently killed by a hawk.

Finches. Purple Finches moved south early in small numbers with 1 flying over PWRC on Aug. 28 (Droege) and 5 at Pinto Marsh on Sept. 2 (Simons) being the first. Other early arrivals of Purple Finches were 1 banded at Mt. Nebo on Sept. 3, 1 in Howard County on Sept. 13 (Harvey), banded at St. Timothy's on Sept. 14, 1 at Point Lookout on Sept. 14 (M. O'Brien) and 2 at Kent Point on Sept. 14 (Wilkinson, Hammer). Gruber estimated 150 House Finches at Rock Hall on Nov. 19. A few Red Crossbills were reported with 3 (a male and 2 females) at Sandy Point on Oct. 6 (Nistico +) and a male on the C & O Canal near Glen Echo on Nov. 26 (Bob Russell). Dave Harvey photographed 2 Common Redpolls at his feeder in Sykesville on Nov. 3 and 6 were in Greenbelt on Nov. 10-15 (Nancy Csider). Teresa Simons found 3 very early Pine Siskins on Green Ridge on Sept. 12 but the next report was 2 at Assateague on Oct. 12 (M. O'Brien). Other October reports of siskins were DC on the 16th (Czaplak), Sudlersville on the 26th (Sumner) and Bray Hill, 1 on the 30th (Skipper). High counts of siskins were 35 in DC on Nov. 3 (Czaplak) and 75 at Rock Hall on Nov. 19 with 500 American Goldfinches (Gruber). Evening Grosbeaks were widely distributed and several early arrivals were noted beginning with Sept. 27 at St. Timothy's (Ross), Oct. 13 at Beltsville (Sumner), 4 banded at Adventure on Oct. 17, Howard County on Oct. 25 (M. Wallace), Allegany County on Oct. 25 with 15 on Green Ridge and 5 at Pinto (Simons), 20 at Bray Hill on Oct. 26-27 (Skipper), 20 in Baltimore County at Woodstock on Oct. 27 (Wilkinson) and 6 at Blackwalnut Point on Oct. 27 (Hammers). Other reports of grosbeaks in November showed increasing numbers with 50 at Rockville on the 11th and 47 at Point Lookout on the 16th (M. O'Brien), 12 at Denton on the 19th (Nuttle) and 250 at Rock Hall on the 19th (Gruber).

3501 Melody Lane, Baltimore, Md. 21207

KING RAILS BANDED AT THE PATUXENT WILDLIFE RESEARCH CENTER

BROOKE MEANLEY

During the period 1965-1970, I banded 55 King Rails (*Rallus elegans*) in the marshy-shrub swamp sections of several impoundments at the Patuxent Wildlife Research Center, located between Laurel and Bowie, Prince George's County, Maryland. Frank McGilvrey banded five King Rail chicks in the same area in the course of banding Wood Ducks (*Aix sponsa*). Most of the rails that I banded were local breeding adults and their offspring. From six to eight pairs nested at the Center during those years.

Birds were captured in two-cell All-Purpose or Cloverleaf Traps, with two off-set entrances and drift fences leading to the entrances or funnels. Twelve Virginia Rails (*Rallus limicola*) and 17 Soras (*Porzana carolina*) were also caught in the traps, as were an occasional Common Snipe (*Gallinago gallinago*), Black Duck (*Anas rubripes*), Wood Duck, Least Bittern (*Ixobrychus exilis*), and Red-winged Blackbird (*Agelaius phoeniceus*). An adult King Rail and eight chicks approximately two weeks of age, caught in a trap on July 8, 1966, was the largest catch at one time in any of the traps.

Forty-three of the King Rails that I banded were trapped in June and July. Most of the adults were in various stages of molt. Rails, like ducks and geese, molt their wing and tail feathers simultaneously and thus are flightless for about a month. The earliest record of a flightless adult was July 7, 1965.

Several recaptures were of interest. An adult banded July 3, 1965, was retrapped July 8, 1966, approximately 50 feet from where it was banded the previous year. An adult banded August 13, 1967, was caught in the same trap on June 24, 1968. A six-week old chick banded July 12, 1968, was recovered in the same impoundment as late as December 12, 1968. An immature banded at one of the impoundments on September 23, 1965, was found dead at a Red Fox (*Vulpes fulva*) den on May 17, 1968, approximately one mile from where the rail was banded. King Rails have occurred only rarely at the Patuxent Wildlife Research Center in the 1980s.

BLACK-LEGGED KITTIWAKE IN NORTHERN CHESAPEAKE BAY

EIRIK A. T. BLOM AND ROBERT F. RINGLER

On October 23, 1983 the authors observed a Black-legged Kittiwake (*Rissa tridactyla*) at Hart-Miller, the dredge spoil impoundment about one mile east of Miller's Island in the Baltimore County section of the Chesapeake Bay. Also present was Mr. Kicker, a birdwatcher from Albany, New York who had driven down in hopes of seeing the Eared Grebe (*Podiceps nigricollis*) seen there the previous week.

We were approaching the crossdike at the center of the impoundment when we saw the bird flying south over the crossdike. It was raining moderately hard, and the wind was southeast at 10-20 m.p.h. When first seen the bird was about 50-70 yards away. It was in view for about a minute, and after it had passed in front of us we were looking straight into the wind and could see almost nothing. Because of conditions, no attempt was made to take notes on the spot. The following description is taken from descriptions made after returning to shore. The authors made independent notes, but agreed on the identification at the time of the sighting. Mr. Kicker left as soon as we landed, and did not provide any documentation.

First impression was of a Ring-billed Gull (*Larus delawarensis*) by size. There was an obvious dark M pattern across the back, formed by dark outer primaries

and a connecting dark bar from the wrist on the leading edge of the wing almost to the joint of the body and the trailing edge of the wing. The rest of the wing was clean and pale (gray or white), palest on the trailing edge of the wing. There was no brown or black color on the trailing edge of the wing. The head was white with a dark spot behind the eye and a dark half collar on the nape. The collar was thin. The tail was white, square, with a distinct, thin, dark terminal band. The body appeared all white. Color of bill, eye, and leg were not seen. The flight was steady and direct. The wings appeared moderately long.

Size, the pattern of the upperparts and the spot behind the eye eliminated all but the smaller, hooded gulls. All of those were ruled out by the lack of dark on the trailing edge of the wing. This is the second report of Black-legged Kittiwake outside of Worcester County.
